

Charmfil Plus Nano based Light Cure Composite 4g. I.

CharmFil® Plus

Light Curing Composite Resin

CharmFil® Plus is a light curing composite resin, it has good depth of cure, low absorption, excellent mechanical properties. It is suitable for esthetic tooth and filling in all cavities classes(Class I ~ V) and its hardness and abrasion are very similar to natural teeth.

▲ Shade: A0, A1, A2, A3, A3.5, A4, B1, B2, B3, C2, D3, U0, I

Product Characteristics

- The lowest polymerization shrinkage
- Excellent shade Matching with natural teeth
- Radiopaque
- Excellent workability
- Universal composite resin
- High compressive strength(395a)
- Biocompatibility

Application Range

- Filling in vast range of anterior and posterior teeth (Class I ~ V)
- Restoration of an anterior tooth fracture
- Tooth orthodontic for esthetic purpose

Classification

- Resin, Filling, Composite

Packaging

- CharmFil Plus : 4g x 1 Syringe
- CharmFil Plus Cap : Unit Dose Capsule 0.25g x 20ea
- Unit Dose Capsule 0.25g x 40ea

Clinical procedures

1. Shade selection 2. Preparation 3. Etching 4. Clearing and dry 5. Bonding 6. Filling 7. Light Curing 8. Polishing
