

CPTY5-A3.5. Reflectys Composite Nano Hybrid A3.5. Compules 0.25g x20.

Formulated to meet the requirements of your
most simple to your most complex clinical cases

Since its launch in 2012, Reflectys is one of the best selling dental composites on the market. Itana Clinical simplifies your practice with a universal composite suitable for all cases.

An optimized composition
Reflectys is a light-cured micro-hybrid composite reinforced with nano-fillers. The filler content (80%) is embedded in a Bis-GMA / TGMA resin matrix.

Reflectys contains particles of different sizes and structure that enhance the material's mechanical resistance and aesthetic properties.

Cross section of Reflectys with scanning electron microscope x1000

Results:
■ Easy to handle
■ Easy to sculpt and polish

INDICATIONS

Restorations of posterior teeth
Restorations of anterior teeth requiring a higher level of aesthetic

Description

Reflectys Composite Nano Hybrid A3.5. Compules 0.25g x20.

Use for restorations of posterior teeth and anterior teeth requiring a higher level of aesthetic (filling of lesions Class I to V, Repair of fractured teeth, corrections of the tooth shape and color, primary teeth).

Reflectys is a light-cured micro-hybrid composite reinforced with nano-fillers. The filler content (80%) is embedded in a resin matrix (20%). Reflectys contains particles of different sizes and structure that enhance the material's mechanical resistance and aesthetic properties.

Exceptional aesthetic

True reflection of natural teeth

Joints cannot be seen : invisible restorations

Low polymerization shrinkage: better marginal adaptation

Easy to handle

Does not stick to instruments & gloves

Quick to sculpt, easy to polish

A wide shade selection with tooth-matching aesthetics
